

Starting System

Description

Starter Interlock System (M/T):

The starter interlock system prevents the engine from starting unless the clutch pedal is fully depressed.

The clutch interlock switch turns on at the position where the clutch disengages: 15 - 20 mm (0.59 - 0.79 in) from fully depressed position.

NOTE: A full stroke of the clutch pedal is 125 mm (4.92 in) from the fully released position.
