

Electrical Power Steering (EPS)

Outline

The NSX/NSX-T uses an electric motor-driven power steering, which possesses the characteristics best suited for a mid-engine automobile. This system is a power-assisted steering device, with a motor inside the steering gearbox driven by the EPS control unit. Its distinctive features are described below:

- Minimized loss of engine horsepower and decreased fuel consumption.
- A linear steering feel and the reduction of kickback.
- The system is compact and lightweight because it requires no complicated hydraulic piping, etc.
